

EB88 Electric Steam Boiler

29-153 kg/hour

The EB88 is Cochran's versatile compact seven-model range designed for steam loads between 29 and 153kg/h. Fully packaged in an attractive modern case, all services are connected at the rear for easy installation and clean modern appearance.

The EB88 offers unrivalled flexibility and mobility in a compact unit that occupies minimal floorspace. It is easily moved to provide point-of-use steam wherever required and the heating elements are individually switched to allow the boiler to respond quickly and efficiently to variable steam demands, providing maximum flexibility. The neat, fully packaged EB88 range is ideal for 'clean environments' in applications such as pharmaceutical, medical, chemical and food and beverage processing.

E18-E72 models feature an integrated feedwater tank and feedwater pump, creating a highly flexible compact unit. The E100 is supplied with a separate feedwater tank. The EB88 will fit through a standard door opening, making it ideal for use in office, small hospitality and catering applications and laboratory environments.

Cochran's EB88 steam boilers offer the following key features:

- Seven Models ranging from 18kW to 100kW.
- Output: 29 kg/h – 153 kg/h (F&A 100°C)
- Operating Pressure: 10.34 barg
- Integrated Feedwater Tank featured on the E18 to E72 models.
- Integrated Feedwater Pump.
- Easily cleaned removable panels enable easy servicing.
- Individually switched heating elements allow EB88 boilers to respond quickly and efficiently to variable steam demands.
- Ideal for 'clean environment' applications, including pharma, medical and food and beverage.

EB88 Electric Steam Boiler
