

ST95 Heat Recovery Steam Boiler

Cochran's ST95 packaged heat recovery steam boiler is available as a single, twin or triple stream design constructed in accordance with BS EN 12953.

It also complies with the requirements of the Factories Act (1961) and Guidance on Safe Operation of Boilers Ref: BG01 developed by the Safety Assessment Federation (SAFED) and the Combustion Engineering Association (CEA). In addition, the ST95 is UKCA, UKNI+CE or CE marked to meet the requirements of the Pressure Equipment Directive (PED), Low Voltage; Electro-Magnetic Compliance & Machinery Safety Directives. Throughout the manufacturing process, this boiler is subject to inspection by a leading Independent Insurance Company, in addition to Cochran's own ISO 9001-compliant quality procedures.

Cochran's ST95 packaged heat recovery steam boiler offers the following key features and optional upgrades:

- The ST95 is a heat recovery boiler range providing single, twin or triple stream solutions.
- Designs to match commercially available gas engines, thermal oxidisers, gas turbines and other heat source.
- Complies with the requirements of BS EN 12953 and the PED (Pressure Equipment Directive).
- Supplied as a package, fully insulated and clad, complete with valves and pipework to ease site installation.
- Optional equipment such as bypass dampers, ductwork and control interface modules are available.
- Variable speed drives for feedwater pump motors help deliver low noise levels and reduce power consumption.
- Enhanced insulation for lower touch temperature.

ST95 Heat Recovery Steam Boiler

Notes:

1. Boiler output based on a feed water temperature of 80°C with the economiser fitted and 7.0 BarG working pressure.
2. Actual boiler output will be dependent on exhaust gas temperature and flow rate.
3. Designs based on typical commercially available gas engine.
